

# SALT ROAD REHABILITATION PROJECT

(FROM ATLANTIC AVENUE TO PLANK ROAD)

APRIL 6, 2022

*This informational newsletter will provide periodic updates (as needed) on the status of the Salt Road Rehabilitation Project and communicate upcoming construction activities to local residents.*

## CURRENT PROJECT STATUS

### ROADWAY CONSTRUCTION PROJECT TO BEGIN IN APRIL

Construction work on Salt Road from Atlantic Avenue to Plank Road is scheduled to begin on or around **April 18, 2022**. This project will widen the shoulders of the road to provide 5 foot shoulders as well as install 2 new layers of asphalt on the road. The project also includes some drainage improvements by reshaping roadside ditches and installing new storm sewers in some areas. This project is expected to be completed this fall. The Contractor for this project is Nardozzi Excavating and Paving, and the Resident Engineer is Perry Gernold. At this time, contractors from RG&E are working on electric lines and the gas main ahead of our project. The work activities anticipated for the roadway project are:

- Brush clearing near the roadway and reshaping banks to prepare for shoulder widening.
- Reshaping of roadside ditches and installing new storm sewers in some areas.
- Milling/paving the roadway and widened shoulders.
- Repaving driveway aprons.
- Establishing new turf with topsoil and seed.
- Relocation of signs and installation of new pavement markings.

Mailboxes may need to be temporarily placed on moveable stands to allow for the work. New mailboxes will be permanently re-installed at the edge of the new paved shoulder at the end of construction.

Traffic will be maintained on-site during construction using lane closures, shoulder closures, and alternating one-way traffic (with flaggers). Access to driveways and side streets will be maintained, except when work is occurring directly in front of these access points. In these instances, there may be a brief delay until flaggers indicate that it is safe to cross the work zone.

We recognize that this project may be an inconvenience, but we ask for your patience for the protection of our workers. Barring any unforeseen delays, we expect this project to be completed this fall.

## PROJECT CONTACTS

Contact information for the project team is below.

**On-site Resident Engineer:**

Perry Gernold  
Erdman Anthony and Associates  
Resident Engineer  
Phone: (315) 719-9846
